## MAHARASHTRA

### 11.16.1 Introduction

Situated in the western peninsular region of the country, Maharashtra has geographical area of 3,07,713 sq km, which is 9.36% of the geographical area of the country. The State lies between 15°35' N to 22°02' N latitude and 72°36' E to 80°54' E longitude and state is bordered by Gujarat & Madhya Pradesh in the north, Chhattisgarh in the east, Telangana, Karnataka and Goa in the south and Arabian sea on the west. The State has three physiographic zones namely Deccan Plateau, Western Ghats and West Coast. It experiences a tropical monsoon climate with hot, rainy and cold weather seasons and dry summers. The annual rainfall ranges between 400 mm to 6,000 mm and the annual temperature varies from 25°C to 27°C. The State is drained by number of rivers which include Godavari, Bhima, Narmada, Tapi, Koyna and Krishna. The State has 35 districts, amongst which 12 are tribal and 7 are hill districts. As per the 2011 census, Maharashtra has a population of 112.37 million accounting to 9.28% of India's population. The rural and urban population constitutes 54.78% and 45.22% respectively. The tribal population of the State is 9.35%. The population density of the State is 365 per sq km, which is close to the national average. The 19th Livestock census 2012 has reported a total livestock population of 32.48 million in the State.

### 11.16.1.1 A Brief Overview of Forestry Scenario

Maharashtra, the third largest State in the country is ranked second among the States in terms of the recorded forest area. Western Ghats of the State have very rich biodiversity. As per the Champion & Seth Classification of Forest Types (1968), the forests in Maharashtra belong to six Forest Type Groups which are further divided into 17 Forest Types. The high rural population of the State depends on the forests considerably for livelihood and basic needs. The State forest department encourages the village communities and other stakeholders to participate in plantation activities. Several initiatives have been undertaken by the State Forest Department like training the farming communities; the concept of easy farming through 'Maharashtra Green Tube Channel' wherein the farmers could learn the advance technologies of agriculture and forestry related activities through online media.

In a first of its kind, a 24-hour toll free helpline number 1926 called 'Hello Forest' has been set up to provide information regarding plantations, protection and mass awareness. The Forest Department has created a mobile application called 'My Plants' to record details of the plantations such as numbers, species and location into the Forest Department's data base. To encourage public participation, the SFD has initiated the 'Maharashtra Harit Sena or Green Army, which is a body of dedicated volunteers to participate in the plantation, protection, and related activities.

Recorded Forest Area (RFA) in the State is 61,579 sq km of which 49,546 sq km is Reserved Forests, 6,733 sq km is Protected Forest and 5,300 sq km is Unclassed Forests. In Maharashtra, during the period 1st January 2015 to 5th February 2019, a total of 3797.16 hectares of forestland was diverted for non-forestry purposes under the Forest Conservation Act, 1980 (MoEF & CC, 2019). As per the information received from the SFD, a total area of 1,47,814 ha has been notified as reserved forests during 2014 to 2019.

Six National Parks, 48 Wildlife Sanctuaries and 6 Conservation Reserves constitute the Protected Area network of the State covering 3.03% of its geographical area.

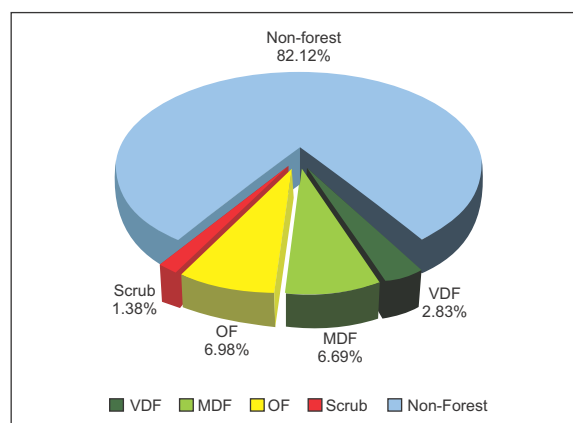

### 11.16.2 Forest Cover

Based on the interpretation of IRS Resourcesat-2 LISS III satellite data of the period Oct 2017 to Jan 2018, the Forest Cover in the State is 50,777.56 sq km which is 16.50 % of the State's geographical area. In terms of forest canopy density classes, the State has 8,720.53 sq km under Very Dense Forest (VDF), 20,572.35 sq km under Moderately Dense Forest (MDF) and 21,484.68 sq km under Open Forest (OF). Forest Cover in the State has increased by 95.56 sq km as compared to the previous assessment reported in ISFR 2017.

The State has reported extent of recorded forest area (RFA) 61,579 sq km which is 20.01% of its geographical area. The reserved, protected and unclassified forests are 80.46%, 10.93% and 8.61% of the recorded forest area in the State respectively. However as the digitized boundary of recorded forest area from the state covers 56,373.92 sq km and the analysis of forest cover inside and outside this area is depicted below.

### 11.16.5 Tree Cover

Forest cover presented in the section 11.16.2 accounts for tree patches of size 1 ha and more having canopy density more than 10%. However, trees occurring in patches of size less than 1 ha including scattered trees are assessed through sampling based methodology. Tree cover in Maharashtra has been estimated as given in table 11.16.13.

**TABLE 11.16.13** Tree Cover in Maharashtra (in sq km)

Tree Cover	Area
	10,806

Tree cover of Maharashtra has increased by 975 sq km as compared to the previous assessment reported in ISFR 2017.

#### 11.16.6 Extent of Trees Outside Forest (TOF)

Trees outside Forests (TOF) refer to tree resources found outside the forests as defined in the Government records. FSI maps forest cover using satellite data and assesses tree cover outside forests using sampling based method. Forest Cover outside the recorded forest area is derived using boundaries of RFA or Green Wash. Extent of TOF therefore may be estimated as the sum of extent of forest cover outside the recorded forest areas (RFA) and tree cover as given in the preceding section.

**TABLE 11.16.14** Extent of TOF in Maharashtra (in sq km)

#### 11.16.8 Carbon Stock in Forest

The total Carbon stock of forest in the State including the TOF patches which are more than 1ha in size is 440.51 million tonnes (1,615.20 million tonnes of CO<sub>2</sub> equivalent) which is 6.18% of total forest carbon of the country. Pool wise forest carbon in Maharashtra is given in the following table.

**11.16.11 Major NTFP and Invasive Species**

Major NTFP and invasive species as assessed from forest inventory data are presented in the table 11.16.21 and table 11.16.22 respectively.

**TABLE 11.16.21** Major NTFP species in the state of Maharashtra

Sl. No.	Species	Plant Type	Relative Abundance (%)
1.	<i>Calamus longisetus</i>	Shrub	46.40
2.	<i>Butea monosperma</i>	Tree	14.35
3.	<i>Pterocarpus marsupium</i>	Tree	7.20
4.	<i>Acacia catechu</i>	Tree	6.96
5.	<i>Buchanania lanzan</i>	Tree	6.53

**TABLE 11.16.22** Major invasive species in the state inside the RFA/Green Wash in Maharashtra (in sq km)

Sl. No.	Species	Estimated Extent
1.	<i>Lantana camara</i>	1,185
2.	<i>Cassia tora</i>	891
3.	<i>Cyperus rotundus</i>	287
4.	<i>Triumfetta rhomboidea</i>	258
5.	<i>Ageratum conyzoides</i>	145

Major NTFP species are given in terms of relative abundance whereas invasive species are given in terms of their estimated extent.

### 11.16.12 Quantified estimation of Dependence of People living in forest fringe villages on forests in Maharashtra

Through a nation-wide study, FSI has done estimation of dependence of people living in the villages close to forest for fuel wood, fodder, small timber and bamboo in quantified terms for each State & UT of the country (Please refer to Chapter 10 in Vol. I for details). The estimated quantities of the four produce for Maharashtra is given in the table 11.16.23

**TABLE 11.16.23** Estimation of Dependence of People in Forest Fringe Villages on Forests in Maharashtra

Fuelwood (tonnes)	Fodder (tonnes)	Bamboo (tonnes)	Small Timber (cum)
95,39,132	15,71,36,100	1,28,673	8,62,138
